Nottinghamshire Health Community

---

SystemOne is a computer system that GPs and other people looking after patients can use to record medical information and other relevant information discussed at your time of contact. Not everyone uses this particular system, but many GPs and Community Health services in area use this system to record patient notes.

## [What is in your Care / Medical Record](#)

Your medical record contains notes taken during every consultation you have had with a doctor or nurse at your practice or community service. Your record is also likely to include copies of any letters you have written and notes relating to any phone calls made with the service that you have been in contact with. Your record will also contain copies of letters from other hospitals and departments, including mental health assessments if you have ever had one. The time period covered by your electronic medical record can vary from one GP practice to another, but detailed information extending right the way back into your childhood may be included. All of this information is sometimes known as “Your Detailed Care Record.”

## [Enhanced Data Sharing Model within SystemOne](#)

Your GP records held at your doctor’s surgery are made available for other health care professionals involved in your care to access. We feel this is in your best interest. Please be assured that no one outside of this practice will access your records without your verbal consent each time you are seen.

If, however you are unhappy with this arrangement, please let us know by ticking the box below and returning this form to the practice.

Name.....

.

Date of Birth.....

I would **NOT** like the information kept at my surgery

(Keyworth Medical Practice) to be made available to be seen by other care teams who are involved in my care.

If you require more detailed information please tick this box and we will write to you in due course.
