## PRIVATE HEALTHCARE

Keyworth Medical Practice does not provide private medical care for patients.

The practice is happy to refer patients for private consultations, investigations and treatment. Patients may either pay themselves or use their private health insurance. The practice does not charge patients for arranging private referrals.

There are a number of circumstances where patients will be charged for services which are not provided on the NHS. These include writing medical reports and completing insurance reports and travel cancellation forms. A full list of non NHS services can be found in the next section.
